A message From the Deputy Head of Section

Think positively:

It is crucial to give your mind consistently positive and harmonious thoughts. If you keep concentrating on how poor, unhappy, weak or incapable you are, then mental images of vulnerability and weakness -along with apprehension and incompetence -will be conveyed to all the body tissues. They, in turn, will be affected by these destructive vibrations, and your body will hinder you with illnesses, imbalances in the various physical systems and lack of motivation or energy.

The idea of subconscious suggestion can be seen in the behaviour of many early Muslims. The Prophet (SAW) even taught his own daughter Fatimah (RA) this technique when she came with her husband, 'Ali (RA), to ask the Prophet (SAW) to help them acquire a servant, as the housework was becoming too much for them to bear. Prophet Muhammad (SAW) sat gently beside them and taught them a form of dhikr Allah (remembering Allah through praising and supplicating to Him) to say every night just before going to bed:

Subhana Allah (Glory be to Allah) -33 times

Allamdulillah (All praise be to Allah) -33 times

Allahu akbar (Allah is the Greatest) -34 times

He (SAW) told them: «That is better for you than a servant.» (Al)mad; al-Albani graded it as sound)

They tried it with absolute faith and belief, and it worked. They found within themselves the strength to perform all the needed work. These are not mere words: 'Ali and Fatimah (may Allah be pleased with them) believed completely in them and in the power and will of Allah (SWT). There is an actual blessing in these words, and sincere faith was the key to receiving that blessing.

Of course, we must still remember that any benefit arising from certain supplications and dhikr comes only by the will of Allah (SWT). We do not have the knowledge of how Allah (SWT) brings this about, but we know and believe that it is true and effective.

Prophet Muhammad(SAW) taught us to make dhikr, and he(SAW) gave us many examples of phrases to use. Some of these are to be recited specifically in the morning and evening. These are not just meditation exercises; they are a continuous active remembrance of the power of Allah (SWT) and a regeneration of our faith and belief. If you practice them regularly and faithfully, they constitute a type of autosuggestion, protecting you from poverty, disease and evil thoughts. This opens in front of you the doors to a prosperous, happy and healthy life in this world and to a promised eternal reward beyond all human limitations and boundaries.

Art

In our art studios we practise art forms such as painting, drawing, sculpture, ceramics, design & crafts. This month we had our super stars of year 8 boys busy with exploring the Elements of Art.

Students also mastered Art Appreciation skills to develop knowledge of the general and everlasting qualities that classify all great art. They learned to analyse the form of an artwork to general audiences to enhance their enjoyment of such works of art, based on the basic 7 elements of art.

Computer Science & Business

This week, Grade 9 had covered the use of hexadecimal systems in regards to developing software, tracing errors, creating webpages using HTML and MAC addresses. In the second session of the week, we also had an interesting discussion on the growing technology, specifically the iPhone 11 & 11 Pro launch, and the students showed their interest or disinterests and their likes or dislikes towards the product. The students seemed to be quite happy to share their thoughts on it.

The Chevron Readers' Cup

We are thrilled to inform students about the return of the four long awaited competitions initiated by the Emirates Airlines and Emirates NBD bank which are:

- The Story Writing Competition - a short story competition held annually for school and university students.
- The Taaleem Award is a poetry-writing competition for school and university students held annually.
- Chevron Readers' Cup – which is a reading competition
- Poetry for All is an annual competition where students learn poetry by heart and give an emotional response to the ideas of the poet.

Parents, please encourage and support your children to participate

How to participate :

Teams of four students study a selection of books to compete for the Cup. The books will include titles

Registration closes: 6 October

First round: 27 October – 7 November (term 1)

Final round: 6 February

Humanities

Innovation in Humanities

Students of Grade 8 created weather tools to measure the weather. They worked by collaborating in groups to make these tools and take reading on a daily basis in order to maintain weather log.

This was an amazing learning experience for them to design their own Weather Station at school.

Innovation Expo 2020

Our school is taking students ahead to explore global outreach and is thrilled to be a part of EXPO 2020 SCHOOL PROGRAMME 2019-20. Students will be participating in different competitions related to INNOVATION and INVENTION, and their ideas will be forwarded on a worldwide platform using 3D printing and by designing prototypes. Teachers from our Humanities department attended a workshop to offer fresh perspectives on Mobility, opportunity and Sustainability to learners.

Science

What have our Year 7s Been up to? Secondary Science Department

Our year 7 students have experienced their very first test for this academic year in unit 7K-Forces. Students had the opportunity to build on their existing knowledge about gravity, friction and air resistance, whilst at the same time learning about upthrust, pressure, Hooke's law and identifying the difference between weight and mass. During this unit, students were also able to further develop their practical skills via the Hooke's Law investigation, by planning a fair test and carrying out the investigation. Students evaluated their results and shared data on results obtained.

A second investigation that students carried out was investigating the effect of ramp height on the speed of an object. Students recorded measurements on time taken for toy car to reach the end of the ramp at different heights. Students then used their data to calculate the speed of the car and form a conclusion based on their results.

Students have started the unit (7A) on cells where they will have received the opportunity to test out their observation skills and scientific drawing skills via microscopy practical. We look forward to seeing our students demonstrate their research skills and creativity by producing a cell model of a specialised cell of their choice.

Student's carrying out Hooke's Law investigation. Students needed to record measurements for spring extension, record results, calculate the mean value and plot a graph to present this data.

Student's carrying out their investigation in to the effect of ramp height on the speed of an object.

Maths Brainteaser

“ Three friends are splitting the bill after a meal out at a restaurant. The waiter says the bill is £30, so the guests split it evenly and pay £10 each.

As he's walking away the waiter realises that he's overcharged the group and the bill should only be £25.

In order to rectify this, he takes the £5 that is owed to the guests in order to bring the bill down to £25. On the way back to the table, he realises that he cannot divide £5 equally between three people.

As the customers are still unaware of the actual total of the revised bill, the waiter decides to just give each of the three friends £1 each and then keep the leftover £2 as a tip for himself.

Basically, each customer got £1 back: meaning they only paid £9 each; bringing the total paid to £27. The waiter has the leftover £2.

The £27 the customers paid, + the £2 the waiter kept = £29 so, if the diners originally handed over £30, what happened to the remaining £1? ”

Physical Education

Football has now 'kicked in' on the boys' side with our boys preparing for the upcoming ministry competition for 2004 in two weeks. The boys have been concentrating on their passing, moving and creating space so that we can gain an advantage in a game situation. The boys' have benefited from double lessons in key stage 3 in which they can concentrate fully on their skills before putting this into a game situation.

For the first time, we have been confirmed as participants at the World School Games basketball competition which will be held in Abu Dhabi this at New York University. Our boys will be staying over on a weekend in December and compete against the best schools from around the globe. Another fantastic opportunity for our boys to showcase their skills, this time, at higher level.

The first SPEA competition of the year was held earlier this week with our under 14 girls' basketball championship. Our older girls have built up quite a formidable reputation over the years inspiring our younger generation. Our girls fully lived up to the expectation coming through the tournament against tough schools without conceding a basket against us, winning all 3 of our games to move into the final stages. A fantastic start to the year for all our students.

Upcoming events: JuiJitsu competition for all grades
Saturday Basketball club 7 – 11
Boys' ministry Indoor Football tournament (2004)

المعلم،، القلب النابض للأمة
 إنّه لمن الجليّ الواضح أنّ المعلّم هو اللبنة
 الأساسية التي لا ينهض المجتمع إلاّ بها،
 والبصمة الدامغة التي تعطي للمجتمع ملامحه
 المهنية، وإن كانت المهن أوردت تضحّ الدماء
 بجسد الأمة فإنّ المعلم القلب الذي يزود تلك
 الأوردة بالحياة. ومن هنا تأتي أهمية المعلم الذي
 كرّس وقته وحياته في صناعة النشء وأشعل من
 عقله وفكره قيساً تهدي بنوره الطلبة، وجعل من
 نفسه جسراً تعبر من خلاله الأجيال إلى محطاتهم
 التالية. وقد قال الشاعر فيما قال:

كُنْ في سماء الناشئين الأنجما
 وكن الدواء لدانهم والبلّسما

"
 يكفيك فخراً أنّ فيصل قالها
 لو لم أكن ملكاً لكنّ معلماً"

و لا يزال المعلم في كلّ أنحاء العالم يواجه
 التحديات فيذلّ منها ما أمكنه إلى ذلك من سبيل،
 ويبدل مافي الوسع لكي يواكب عجلة التطور
 ويضفي على عملية التعلم ما يناسبها من الأساليب
 وما يلائمها من المهارات. وإنني كمعلم في
 الإمارات العربية المتحدة التي تعتبر من الدول
 الرائدة في مجال التعليم فإنني أقتبس من رؤاها
 بعض رؤاي ومن طموحاتها بعض طموحاتي في
 أن أكون أفضل معلم في العالم وليس هذا بغريب
 ولا بعيد عن معلم في دولة متميزة.

ورأى مداح حميد، معلم، أنّ المعلّم هو اللبنة
 الأساسية التي لا ينهض المجتمع إلاّ بها، والبصمة
 الدامغة التي تعطي للمجتمع ملامحه المهنية، وإن
 كانت المهن أوردت تضحّ الدماء بجسد الأمة فإنّ
 المعلم القلب الذي يزود تلك الأوردة بالحياة. و

من هنا تأتي أهمية المعلم الذي كرّس وقته وحياته
 في صناعة النشء وأشعل من عقله وفكره قيساً
 تهدي بنوره الطلبة، وجعل من نفسه جسراً تعبر
 خلاله الأجيال إلى محطاتهم التالية.

حامل شعلة الحضارة

عندما اصطفى الله حبيبه (صلى الله عليه وسلم) ليكون هاديا للبشرية وحاملا للواء الحضارة لتطهير الأرض من دنس الجهل والجاهلية وتنوير القلوب والعقول وتنقية النفس البشرية من شوائبها الأمانة بالسوء فكان لزاما أن يوجهه (صلى الله عليه وسلم) إلى مفتاح ذلك كله فبدأ تكليفه بقوله تعالى : (اقرأ باسم ربك الذي خلق ..) ليعلن للبشرية جمعاء أنه لن تكون هناك حضارة ولن يكون هناك تغيير إيجابي في حياتنا إلا بالعلم واتخاذ منهجا للتقدم والتحضر الإنساني فأعلنها الحبيب المصطفى (صلى الله عليه وسلم) في الأفاق قائلا : (إنما بعثت معلما ، إنما بعثت لأتمم مكارم الأخلاق) فكان خير معلم للبشرية وبهديه أشرقت الأرض بنور ربها ،: (روى أبو داود والترمذي وابن ماجه وابن حبان في صحيحه وغيرهم أن النبي صلى الله عليه وسلم قال في ضمن حديث طويل: " إن العلماء ورثة الأنبياء وإن الأنبياء لم يورثوا دينارا ولا درهما، إنما ورثوا العلم، فمن أخذه أخذ بحظ وافر)

فهنيئا لك أيها المعلم في يومك ولا يكفيك يوم لتحدث عن مكانتك فكل يوم هو يومك فأنت صانع الرجال وباني الحضارات فقد سبقنا الله ورسوله منذ أكثر من خمسين وأربعمئة ألف عام فقال تعالى تكريما لك : (شهد الله أنه لا إله إلا هو والملائكة وأولو العلم قائما بالقسط لا إله إلا هو العزيز الحكيم) وقال المعصوم (صلى الله عليه وسلم) : عن أبي أمامة الباهلي قال : ذكر لرسول الله صلى الله عليه وسلم رجلان: أحدهما عابد، والآخر عالم، فقال رسول الله صلى الله عليه وسلم: فضل العالم على العابد كفضلي على أدناكم. ثم قال رسول الله صلى الله عليه وسلم: إن الله وملائكته وأهل السموات والأرضين حتى النملة في جحرها وحتى الحوت ليصلون على معلم الناس الخير) ما أروعه من تكريم لتعزز برسالتك أيها المعلم ولتفتخر بمكانتك ولكن نتكن على قدر هذه المسؤولية وهذه المكانة لتستحق هذا التكريم فلن نتقدم الأمم إلا بأدائك رسالتك على الوجه الصحيح لتبني العقول وتنشئ الأجيال على أسس أخلاقية راسخة تتحلى بها أنت قبل أن تغرسها بهم لتؤتي ثمارها معدا نفسك إعدادا قويا لتنتقل إليهم العلوم والمعارف الصحيحة وتنير عقولهم وتصفل مواهبهم وتعزز مهاراتهم.

ارفع رأسك أيها المعلم واعزز برسالتك وامض على طريق الرقي والتقدم الحضاري فأنت حامل شعلة الحضارة التي لن تنطفئ طالما حملتها بثبات ويقين وفخر واعتزاز

مع خالص تقديري لكم ولكل معلم صاحب رسالة يؤديها على الوجه الذي يرضي الله ورسوله مع فخري واعتزازي أن أكون متعلما ومعلما

دمتم ودام المجد حليفا لكم وطبتم وطاب ممشاكم وتبوأتم من الجنة مقعدا

6th form news

On Thursday 3rd October, our wonderful year 12 and 13 girls were invited to Jumeirah beach hotel for a university fair to inspire them on their future choices for education. There was an amazing line-up of universities which varied from within the UAE to the exquisite schools in America, UK, Canada and more. Students had the opportunity to sit in on sessions from some of the country's top key note speakers, providing students with insight into how to prepare for university and what makes student applications to universities stand out. This then led onto an open question and answer session, where our year 12s were extremely lucky to have been able to speak with different heads about all the requirements, scholarships and educational advancements provided by different universities and colleges. We hope that this was an eye-opening experience for our students, and we wish them all the luck for their upcoming university applications.

Social Worker's Advice.

Catering To Your Child's Learning Type

A quick guide on figuring out what kind of learner your child is and how you can capitalize on those strengths...

Visual Learners

- **Strengths** at their best when subject matter is visually represented in formats such as diagrams, charts, maps, infographics
- **Learning Stimulated By** good note-taking, diagramming subject matters, making lists, using highlighters, flashcards

Auditory Learners

- **Strengths** are able to better recall specific details from lectures and conversations, are better at giving oral representations, and may be more rhythmically oriented
- **Learning Stimulated By** audiobooks, podcasts, mnemonics, open discussions

Catering To Your Child's Specific Learning Type

Reading/Writing Learners

- **Strengths** learn best taking exhaustive notes to commit things to memory, then using them to study from, sans any distractions
- **Learning Stimulated By** working solo with proper resources provided (like references /dictionary), and by heavy note-taking

Kinesthetic Learners

- **Strengths** learn best when performing experiments and giving physical representations of abstract models
- **Learning Stimulated By** group settings, hands-on activities, model-building, tactile learning

Parents corner

So here we are! A brand-new school year, learning about new things, building friendships, making beautiful memories, and let's not forget, school rounds, navigating through traffic, nurturing our children of various ages, homework, exams! Sometimes it all gets so overwhelming as a parent.

Its 7pm on a school day. The toddler is having a meltdown because he can't find his Lego shield (that's 2 cm by 2cm, mind you!), one child has a test the next day that he forgot to revise for, the other one is stuck on a topic and can't figure it out, and the family still has to have dinner and get to bed, and we may have guests coming over later!

At this time, we as parents have to realign ourselves with our purpose. Why are we here again? To worship Allah.

What is parenting, being patient, helping people out, feeding people, showing mercy to them? Worship.

Suddenly something clicks and we realize what's going on. Allah has put us in charge of these beautiful gifts – our children- and we worship Allah through nurturing them. They are trusts kept with us for a short while. We have to fulfil our duties towards them, all the while remembering to ask Allah for help repeatedly. Take prayer, for example. It is our duty and we do it with love. We always want to perfect our salah, to get the Quran recitation and actions right, we have a special prayer mat, we always make sure we have wudu and khushu.

Let's keep the same spirit when we parent our children. Let's remember that we are in a state of worship and keep improving ourselves, let's be patient again and again, even if it is so difficult sometimes and keep making dua for ourselves and our children.

Let's nurture our children with love and mercy. Maybe this whole parenting thing is our opportunity to get to Jannah. So parents, make a dua, take a deep breath, make yourself a cup of tea and let's get back to ~~work~~ worship!

Student corner

We are thrilled to inform students about the return of the four long awaited competitions initiated by the Emirates Airlines and Emirates NBD bank which are:

The Story Writing Competition - a short story competition held annually for school and university students.

The Taaleem Award is a poetry-writing competition for school and university students held annually.

Chevron Readers' Cup – which is a reading competition

Poetry for All is an annual competition where students learn poetry by heart and give an emotional response to the ideas of the poet.

These competitions are aimed to increase school students competing with university Level students and realizing their potentials and reaching for the impossible by unleashing their creativity on to a blank canvas.

“Participating in competitions as such these empower you to display your confidence and pour out scrambled words onto paper and finish the puzzle, leading in a beautiful piece of unique art belonging to you alone. Reciting poetry improves your confidence in delivering public speeches and removes the taboo against speaking with emotions and sentiments. Furthermore, the reading competition aims at getting the readers to read the story in depth and answer critical questions which in the end shapes the mind of a blossoming reader that are stepping stones for the budding writer.”

Events:

ISCS students participated in the designing of a new park in Muwaileh.

Students used their electronic devices to answer series of questions about the location such as what facilities are available in the area, what they like about the location, how the park will attract surrounding neighborhoods. It is much needed recreation facility. At the end, the organizers were very pleased with our students for their participation and maturity.
